Professional Summary

Highly motivated and solutions-driven IT professional with hands-on experience in software development, networking, and system administration. Skilled in PHP, Laravel, and front-end technologies, with a strong foundation in network infrastructure, cybersecurity fundamentals, and cloud services. Recognized for technical excellence through achievements with Microsoft and Cisco training programs.

Key Skills

- PHP & Laravel Backend Development
- HTML, CSS, Bootstrap, and JavaScript
- Database Management (MySQL, phpMyAdmin)
- Network Configuration & Troubleshooting
- Cisco Networking Basics (Routing, Switching, VLANs)
- Microsoft Productivity & Cloud Tools
- IT Support & Technical Documentation
- Problem Solving & Critical Thinking
- Version Control (Git / GitHub)

Achievements & Certifications

Microsoft:

- Microsoft Digital Literacy Certificate
- Completed Microsoft productivity and digital skills programs covering Word, Excel, PowerPoint, and cloud integration

- • Recognized for excellence in using Microsoft tools to improve workflow and digital communication

Cisco:

- • Cisco Networking Academy Coursework Completion
- • Intro to Cybersecurity
- • Networking Essentials
- • Hands-on foundational knowledge of network security, IP addressing, packet tracing, and network device configuration

Education

Diploma in Software Engineering, Lincoln College of Science, Management and Technology – coursework included software development, computer architecture, database systems, and network fundamentals.

Projects

- Accounting Dashboard System – Built using Laravel framework with invoice, expenses, transaction history, and user authentication modules.
- Web Form & User Management System – Developed a PHP-based application with admin dashboard for managing users and submitted records.
- Networking Practice with Cisco Packet Tracer – Designed basic LAN network with switches, routers, and VLAN configuration simulation.
